

New Privacy Policy Tool in WordPress

The latest release of WordPress includes a template to help you to create your website's privacy policy. To see the template and suggested content please follow the steps below

1. Log in to the Dashboard with your WordPress username and password.

2. Under the **Settings** tab select **Privacy**

3. Click **Check out our guide** to view the recommendations on what to include

4. To create a page with the recommended sections, select Create New Page
5. Fill in the required information as relevant to your own organisation.
6. Publish the page and add it to the menu
